VAPMS enables the stock brokers

To manage all the customers' accounts with our well-developed Data Acquisition component (DAC), DAC enables the stockbrokers to enter the transactions done by each and every customer concerned to the stockbrokers.

The profit and Loss details are provided by the well-equipped reports, which are developed to suit the stockbroker needs.

The well equipped Reports enables the Brokers to create set of Family Ids for all the members in the family and accordingly provide the transaction details to that particular family.

To Organized data by the DAC the power of multimedia is added up where the callers can call in to the issued Phone Numbers at any time to get to know the Profit and loss details.

The Funds Switching, Funds Transfer and many other Features are co-existing in VAPMS.
